

Industrial Nets

Plastic Filter Net

Plastic filter net is made of HDPE or PP through extrusion. It features stable structure, acid and alkali resistance, low and high temperature resistance, anti-rust, anti-corrosion and exceptional durability. As a plastic rigid mesh tube, it acts as a center core in filter cartridges and provides exceptional structural support. It has high strength and rigidity, so it can also be used as outer containment sleeves to protect filter media from damage during handling and cleaning.

FEATURES

- ✓ High strength and rigidity.
- ✓ Chemical resistance.
- ✓ Acid and alkali resistance.
- ✓ Low and high temperature resistance.
- ✓ Stable structure, long lifespan.
- ✓ Can be burnt down.
- ✓ Support and protect the filter elements.

SPECIFICATION

Material	PP/HDPE
Color	White, black
Mesh type	Diamond, square
Thickness	2 mm – 6 mm
Open area	30% – 75 %
Diameter	27 mm(± 0.5) – 140 mm(± 1.0)
Length	200 mm - 3000 mm
Min. operating temperature	-40 °C
Max. Operating temperature	+130 °C
