Plastic Garden Fence

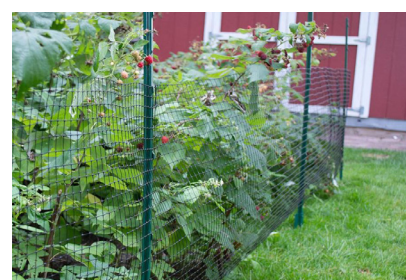

Plastic garden fence is a multi-functional plastic fence made of HDPE or PP after extrusion.

It prevents small animals from entering your garden and damaging your plants. You can cut the plastic garden fence at will without worrying about sharp edges causing damage to your family or pets. It is easy to install and remove, all works can be done by one person only. Besides, it has excellent corrosion resistance and work well in acid and alkaline conditions. Moreover, it has a long lifespan and can be used many times.

FEATURES

- ✓ Made of PP or HDPE, easy to install and remove, and can be repeatedly used.
- ✓ High tensile strength, impact resistant, corrosion resistant and work well in acid and alkaline conditions.
- ✓ UV stabilizer additive is added to make it can be used in outdoors for a long time.
- ✓ It is lighter and more economical than metal wire mesh.

SPECIFICATION

Material	PP/HDPE
